5.詳細設定タブ

[]

[OK]

The screenshot shows the 'example' settings dialog box with the '詳細' (Advanced) tab selected. The 'サーバーのポート番号' (Server Port Number) section has 'SMTP' set to 587 (standard 25). The 'SMTP認証' (SMTP Authentication) section has 'SMTP認証' (checked), 'CRAM-MD5' (checked), and 'LOGIN' (checked). The 'ユーザーID(U):' (User ID) and 'パスワード(P):' (Password) fields are both empty. The '認証後' (After Authentication) field is set to 300 milliseconds. The 'ESMTPを使用(W)' (Use ESMTP) checkbox is checked. The 'OK' button is highlighted with a red box.

SMTP	587
